

Now that Donald Trump is again President of the United States, all the documents signed on his first day as president nearly two-thirds were straight from the pages of Project 2025 (P25). During his campaign Trump over and over again indicated he knew nothing about Project 2025. Yet, once he was sworn in as president, he has already placed five of those involved with Project 2025 in his cabinet. Here is a list of those appointees.

- Russell Vought - president of the Center for Renewing America
- Brenden Carr - Federal Communications Commission
- Pete Hoekstra - Michigan Republican Party Chair
- John Ratcliffe - director of National Intelligence
- Tom Homan - Trumps new border czar

Since Trump has welcomed Project 2025 into his cabinet what is going to stop him from appointing others and using this project to "cleanse" America? (Reading Project 2025 will give you insight as to what he plans to do and how to achieve his degradation of America.)

It seems the political right has forgotten America was built on the backs of immigrants and for centuries we have invited and welcomed all walks of life. The fabric of America has gone from being colorful, like a tapestry, to something unrecognizable. Trump and his allies of degenerates have begun to change parts of the constitution which made America great into something undesirable.

America is not Russia, China, or North Korea. It is an independent democracy, by the people, for the people and this is the essence of who we are. "We the people."

EVERYONE is equal, rich, or poor. Where color should not matter, gender is like the name given at birth. These are merely descriptions of an individual, yet this does not limit us to what we can achieve. Nor does it restrict us from changing those dynamics. But Project 2025 wants to rid America of its individuality to follow a restrictive, more controlled way of existence. This is not democracy but communism, a war on freedoms and to be one's own self.

The Trump administration has done or will do the following:

- Rescinded Biden's action to lower prescription drug costs for Americans on Medicare and Medicaid. Some medications by as much as 4200%.
- Trump removed a page from the White House website "Selecting your gender marker." The webpage allowed people applying for a new or updating their passports to select (M) male or (F) female or simply put (X) as the gender marker. Identifying transgender individuals. The page also promoted "the freedom, dignity, and equality for all people - to including LGBTQ+ individuals."

- Trump has defended H-1B visas. Citing "We have to let really competent people, great people, come into our country and we do that through the H1 program. Trump wants only "quality" people to come into America.
- Supports and defends January 6<sup>th</sup> insurrectionist including Oath Keepers. Trump pardons 1,500 Capitol rioters.
- Chief immigration judge Sheila McNulty, head of policy Lauren Alder Ried, general counsel Jill Anderson and the office's acting director Mary Cheng, all civil servants were fired.
- The Affordable Care Act (ACA), known as Obamacare, is in peril. Donald Trump has issued a series of executive orders, some of which target the healthcare market. These changes are expected to affect the enrollment process and medical insurance coverage for an estimated 24 million people.
- Trump has withdrawn the United States from the World Health Organization and the Paris Climate Accords. Additionally, ending Biden's electric vehicle mandates and increasing oil and gas drilling in Alaska. All of which appears in P25 months earlier.
- A document was signed by Trump to rescind birthright citizenship.
- An executive order rescinding the security clearances for 51 former intelligence officials. General Mark Milley lost his security clearance and could be demoted and lose his pension because of Trump's appointees. This too mirrors P25 directives explicitly.

This is just a few of the executive orders Trump signed.

Project 2025 unapologetically has set precedent by presenting a blueprint for building an authoritarian presidency. These day - one document signed by Trump's administration is the first concrete steps towards realizing that vision. That vision being Project 2025.

Brendan Carr has been nominated by Trump to be head of the Federal Communications. This is the same individual who also contributed pages P25. Carr is calling for the end of censoring of "political viewpoints" on formats or platforms such as Facebook and YouTube.

Facebook's owner Mark Zuckerberg and its parent company Meta announced the end of third-party fact-checking program of political content. Zucker of Facebook and Sunday Pichai, CEO of Alphabet, YouTube's parent company, both contributed and attended Trump's inauguration.

These are some the facts being reported in the "company" of Trump. Since Trump's inauguration the United States has been alerted to the ambitions of Trump and his allies, the authors of Project 2025. Now that Donald J Trump (DJT) does not need to

hide the fact that Project 2025 has been in his back pocket long before his taking office. The Authoritarian government highlighted in P25 is becoming a reality.

America needs to fasten and pull its seatbelt tight, as the next four years are going to be more than just bumpy. Health insurance providers will be able to deny coverage for those who have pre-existing conditions. Medications will become more expensive because Trump is looking to dismantle "The Affordable Care Act" otherwise known as "Obamacare." With the current cost of medical care, which is expensive, it will become unattainable.

Obamacare is setup to include everyone, not just a selective few. Individuals were left to suffer because insurance was too expensive, putting medical attention out of reach.

Trump is rounding up immigrants who he believes are criminals in their countries. In so doing he is also gathering up those who 'seem' to fit the bill. This endeavor is costing Americans hundreds of thousands of dollars daily, which will add up to millions. Trump is transporting immigrants via military aircrafts.

These political moves are detrimental to the existence of the United States of America. Immigration laws, Abortion, LGBTQ+ rights, DEI Program, U.S. Military, and Federal Funding for Medicaid and Medicare are on chopping blocks. In addition to all this mayhem, Donald Trump wants to put Robert F Kennedy in charge of Department of Health Services, which has a billion-dollar budget. Kennedy and his wild eccentric views are a cause for alarm.

The Department of Justice has been dismantled, and several career civil servants have been let go by Acting Attorney General James McHenry. McHenry is responsible for letting go of Molly Gaston, J.P. Cooney, Anne McNamara, and Mary Dohrmann who were under the direction of Jack Smith. Because of Judge Cannon's refusal to prosecute Donald Trump, Jack Smith's document case has fallen apart.

The only case to actually go to trial was the hush money case brought by Manhattan Attorney General Alvin Bragg. Trump was convicted and now is the only sitting president in history who is a convicted felon to be elected to the Office of President.

Nearly all the changes in government, Trump is trying to establish, appear in Project 2025. Another item out of the P25 playbook is birth-right citizenship. All those who are born to parents who are not citizens of the United States will no longer be protected by the 14<sup>th</sup> Amendment, which grants citizenship to all people born or naturalized in the United States

The Constitution of the United States is being challenged by Trump's administration and there are already lawsuits being filed to combat these changes in our government. Republicans control the House and Senate, and Democrats need to step up, do their best to curb the insanity Republicans are putting forth.

"We the People" need to step up, let the Trump administration know through our Representatives in the House and Senate what should be addressed. This country was not founded on the idea of an Authoritarian state but a Democratic system of checks and balances. Where no one party controls everything.

Trump's admiration for Putin and other leaders is disdainful, as these leaders control with fear and intimidation which should not be condoned. Trump, a convicted felon, should never have been elected. Now he has control of the United States, the House of Representatives and Senate; America is under his thumb, and he thrives on chaos.

It is said a house divided will fall. Now, in the year of 2025, the peril American is in cannot be ignored. Christians across America have chosen a felon to lead our country overlooking his transgressions. The sin of this country is not in immigration, DEI programs, the Department of Justice, or in the lives of the LGBTQ+ Community but in those who have voted and installed an immoral man into the highest office in America, the presidency.

Donald J Trump is dangerous, and he will bring this country down if "We the People" don't speak up, stand up, and be counted we will lose that which is most dear. Freedom! Our freedoms to welcome those who come to the United States to find a better life, freedom to be equal no matter your status, freedom to love who you want to love without fear of being demoralized by those who believe themselves to be "Christian." Freedom is not just another word; it represents who we are and for what we stand. There is so much to lose if Trump is allowed to arbitrarily change the rules to his favor.

We do not need Donald J Trump! What we do need is a president who stand up for Americans and the beliefs of a whole nation and not the select few.
